

## Get Ahead of This Heating Season

Upgrade your equipment or schedule annual maintenance for your existing system this fall and be worry-free all winter long!

### High-Efficiency Upgrades

Did you know that new, energy-efficient oil and propane heating equipment can reduce your heating costs by an average of 30-40% this winter? If your boiler or furnace is over 15 years old, upgrading to a new system will not only help you save significantly on fuel and operating costs, but you will also benefit from greater peace of mind knowing that your equipment is operating at peak efficiency and is unlikely to require unplanned repair.

Improve your home comfort and the overall value of your property with a new heating system by leading industry manufacturers like Trane®, Buderus & Lochinvar®. Our knowledgeable staff will work with you to determine the best fit for your home heating needs and your budget. Whether you heat with oil or propane, we can provide a highly efficient model to best suit your needs!

**Call us at (413) 532-3500 for a free estimate!**

**\$200 OFF  
A NEW HEATING  
SYSTEM  
INSTALLATION**

Coupon not valid on previous installations. One coupon per customer. Service must be provided by Fuel Services, Inc. Expires 12/31/14.

### Important Annual Maintenance

Benefit from using less oil or propane while enjoying better comfort and reliability. Annual heating system maintenance is extremely important for your home safety and your energy savings. You can lower your heating costs by up to 10% annually by having your equipment serviced just once a year!

**Take advantage of our precision tune-up this fall and be ready for winter:**

- Keep your system running safely and efficiently
- Reduce unexpected service calls
- Extend the life of your heating system
- Maintain your manufacturer's warranty

*Many manufacturers will void your warranty if you do not receive professional preventive maintenance each year.*

**Keep your system running reliably, efficiently, and safely with an expert tune-up from one of our licensed technicians. Schedule yours by contacting our office today at (413) 532-3500!**

### DID YOU KNOW WE OFFER COMPLETE PLUMBING SERVICES?

- Water Heater Service & Installation
- Plumbing Fixture Installations
- Faucet & Shower Fixture Repair
- Complete Plumbing Renovation
- ...and more!

**\$40 OFF ANY PLUMBING SERVICE**

Coupon not valid on previous installations. One coupon per customer. Service must be provided by Fuel Services, Inc. Expires 12/31/14.

**CALL US FOR DETAILS, AND RELY ON FUEL SERVICES WHENEVER YOU NEED PLUMBING ASSISTANCE!**

# Heating Oil & Propane vs. Natural Gas: What's the Difference?

As energy options continue to diversify, we'd like to remind our customers why we recommend home heating oil or propane for your home heating needs. Keep your home warm responsibly when it comes to safety, efficiency, and environmental effects.

## Home Safety

- **Oil:** Heating oil is non-explosive, so you can be worry-free each winter knowing that you are heating your home with a safe, dependable, and efficient fuel provided by your trusted local fuel company.
- **Propane:** We take pride in keeping our customers safe by transporting and delivering your fuel carefully as well as performing routine safety checks on your propane equipment. Should a propane leak occur, the fuel has an added odor that is easy detectable. If you have questions about propane safety, please contact our office any time!

*For greater peace of mind for the safe operation of your system, don't forget to schedule your annual tune-up! (See reverse.)*

## Environmental Protection

- **Oil:** The heating oil industry has cut its total greenhouse gas emissions by about 33% over the last four decades. Alternatively, natural gas leaks in the U.S. produce 28 million tons of methane – a greenhouse gas which is approximately 30 times more potent than carbon dioxide – every year.
- **Propane:** Unlike natural gas, propane is not considered a greenhouse gas and is safe for the environment if released into the atmosphere. One of the cleanest burning of all fossil fuels, propane is an approved, clean fuel.

## Cost Savings

- **Oil:** As an oil heat consumer, converting to natural gas can cost more than \$10,000 in parts and labor, while upgrading your current oil-fired boiler or furnace can save you up to 30% on your annual fuel bills.
- **Propane:** If you already heat your home with propane, upgrading your current propane-fired boiler or furnace can save you up to 40% on fuel costs annually.

*Upgrading to a new heating system can also give you peace of mind that your equipment is less likely to need emergency repair! (See reverse.)*

## Overall Value

- **Oil:** The heating oil industry is unique when it comes to the personalization, competitive pricing, and local reliability we residential fuel oil companies offer to our customers. As a Fuel Services customer, you can always depend on quality full service for your home comfort needs – at any time and in any weather.
- **Propane:** This multi-purpose fuel can be used for home heating, water heating, clothes drying, cooking, grilling, and more. Like heating oil, propane customers choose which local company delivers your fuel and services your equipment. Unlike major utilities, we at Fuel Services are close-by and available to assist you 24/7 if you need emergency service.
